

High Competence Network e.V.

Cross-sector network of excellence

The association High Competence Network – HCN e.V. emerged from the regional research association Holz Cluster Nord (northern wood and timber cluster) in 2008. HCN e.V. cross-links stakeholders from the forest and timber industry, regional development, logistics, information and communication technology, research & development and project management.

Solid network for strong stakeholders

It is the overall aim of HCN e.V. to strengthen the potentials available in education, research, and thus enhance the innovation strengths of regional enterprises and pool their strategic orientation in collaborative projects. The interdisciplinary local, regional and national collaboration of enterprises, institutions from research and science is aimed at enhancing the enterprise and ensuring a solid positioning of the network. HCN e.V. sees itself as innovative and essential driving force that initiates and implements projects at a regional, national and European level. The pooling of individual forces, various enterprises and institutions from research and science increase the excellence and sustainability of projects.

Project interests

The intense collaboration within HCN e.V. is based on three profile lines:
Environment & Resources | Logistics & Mobility | ICT & Sensor Technology

Projects

- **Holz Cluster Nord** – Northern Wood and Timber Cluster
- **RegioPower** – A regional IT-based platform for bringing resource needs and land-based resource production together
- **WoodApps** – Improvement in collaboration along the wood value chain through knowledge-based methods and mobile applications
- **Hardwoods Are Good** – Supporting entrepreneurs of the forestry hardwood chain in the South Baltic Region
- **BalticAirCargoNet** – Enhancing competitiveness, efficiency and security of air cargo services in the Baltic Sea Region
